Basketball Games – February/ March
General Council – February/March
Online Survey via SurveyMonkey
Total Survey Responses : 218

Data Analysis Score Grade

CTUIR respondents and non-CTUIR respondents frequently show similar experience levels regarding each First Food. Using the experience scale of 0-3 (explained below), Tables 1 and 2 show CTUIR respondents have an average 1.23 experience score and non-CTUIR respondents have a 1.17 experience score, or very slightly less.

CTUIR women have a slightly greater experience score (1.09) compared to CTUIR men (0.88) on a scale of 0-3. This varies between the First Food groups:

First Food	CTUIR Men's Experience	CTUIR Women's Experience
Fish	1.32	1.27
Game	1.29	1.20
Berries	1.13	1.23
Roots	0.88	1.08
Other Traditional Foods	1.11	1.09
