Tribal members are invited to take a short survey to share their thoughts on a draft nuclear policy that addresses the growing interest in making nuclear energy commercially available shown by the current federal administration, the States of Oregon and Washington, and some Tribes.

The policy maintains a strong stance of opposition to nuclear activities that threaten Tribal values, rights and resources, while recognizing the importance of establishing clear conditions, grounded in Tribal sovereignty, environmental stewardship, and economic justice under which engagement, participation, or mitigation could be considered. It seeks to better guide Tribal staff's actions and communications in real time to be actively involved and develop plans to protect Treaty rights better.
